Enrique Firpi

A totally unique style in exploring harmonical and technical possibilities in a more latin as well as a bebop approach. The themes for improvisation sound like common ground, until the trio takes off - in almost separate ways but still forming a unity in timing and swing.

A delight for the heart, ears and soul - enjoy!

Sir Jan Akkerman

This is a romantic set by the trio. Every track strikes an emotional nerve and every track has a strong groove that'll capture your heart along with your mind. Really liked this!
